Notes

When a value is missing from one of selected geographies, Social Explorer denotes it with an asterisk (*) in the All Selected Geographies column. The total is of the available geographies only.

Some reported values for Low Birthweight Births (< 2.5 kg) are considered unreliable since based on counts of twenty or less. Users are highly encouraged to refer to the County Health Rankings & Roadmaps for more information. Values for TOTAL (All Selected Geographies) labeled with asterisks indicate that some of the selected geographies do not contain any values.
